2.4 Template

Use the template as it is. All margins, column widths, line spaces, and text fonts are prescribed; please do not alter them. Define abbreviations and acronyms the first time they are used in the text, even after they have been defined in the abstract. Abbreviations such as IEEE, SI, MKS, CGS, sc, dc, and rms do not have to be defined. Do not use abbreviations in the title or heads unless they are unavoidable.

2.5 Equations

Equations must be numbered consecutively. Equation numbers, within parentheses, are to position flush right, as in (1), using a right tab stop.

$$A + B = X \quad (1)$$

Note that the equation is centered using a center tab stop. Be sure that the symbols in your equation have been defined before or immediately following the equation. Use “Eq. (1)”, not “(1)” or “equation (1)”, except at the beginning of a sentence: “Equation (1) is . . .”

2.6 Copyright Form

Author must submit copyright form before the paper is published. Authors are responsible for obtaining any security clearances.

Do not submit a reworked version of a paper you have submitted or published elsewhere. Do not publish “preliminary” data or results. The submitting author is responsible for obtaining agreement of all coauthors and any consent required from sponsors before submitting a paper.

3. CONCLUSION

A conclusion section is required. Conclusion should review the main points of the paper, do not replicate the abstract as the conclusion. A conclusion might elaborate on the importance of the work or suggest applications and extensions.
